

J-shield “Don’t Worry! ... Be Happy!”

Don't worry if FCC authorizes broadband wireless near GPS L1 band. We already have proven technology to protect not only against this particular one, but against all similar systems in all GNSS bands. It is implemented and fully tested option in our GNSS antennas. Our nation can have full benefits of high precision GNSS (no performance degradation at all) and full benefits of broadband wireless.

Those who cannot innovate in Silicon Valley, lobby in Washington DC by mis-informing the FCC and the Congress about the status of technology and about the status of existing receivers in the field.

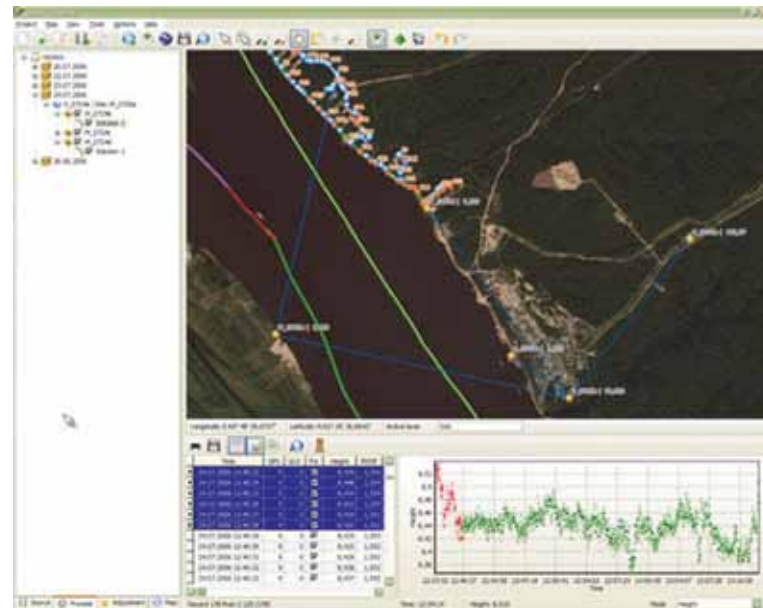

TRIUMPH-1

Fully integrated package

An elegant, rugged, light, and hermetically sealed box accommodates **all GNSS and modem electronics and antennas.**

Justin Survey and GIS software

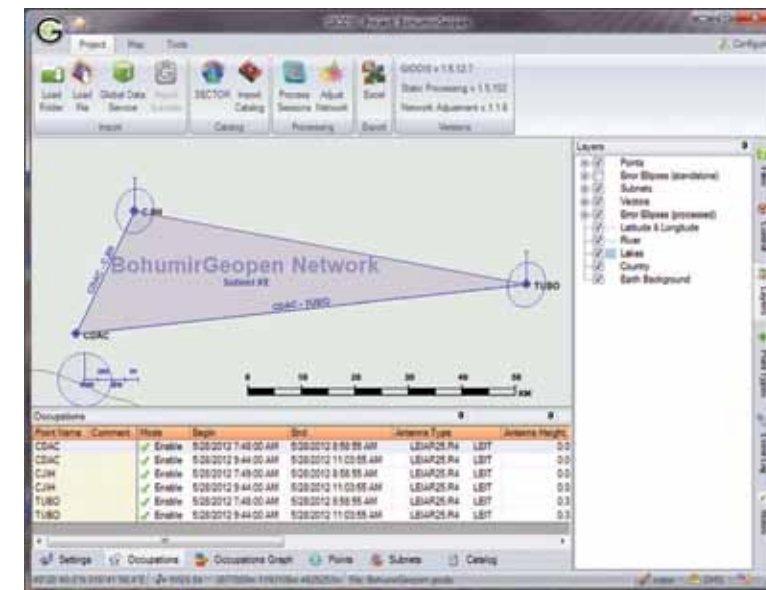

Full range of features
for **geodetic** and
surveying tasks.

Office post-processing
software

Giodis

for high-precision **geodetic** and
surveying applications.

Solves **wide range** of practical
surveying tasks using advanced
scientific approach.

NetView

Application to easily control JAVAD GNSS receivers.

Allow efficiently manage
receiver parameters
and **commands** via a
user friendly graphical
interface.

NetHub

Receiver management
and control software.

Windows® application
for **controlling**
GNSS receivers
developed by JAVAD GNSS, INC.

All-in-one

TRIUMPH-VS

GNSS receiver that combines high performance **216-channel GNSS receiver**, all-frequency **GNSS antenna**, and a modern featured **handheld**.

Survey with Lift&Tilt

You don't need to look.
You don't need to touch.

TRIUMPH-VS brings this new **revolution to surveyors**
