

J-shield “Don’t Worry! ... Be Happy!”

Don't worry if FCC ever authorizes any broadband wireless near GPS L1 band. We already have proven technology to protect not only against this particular one, but against all similar systems in all GNSS bands. It is implemented and fully tested option in our GNSS antennas. Our nation can have full benefits of high precision GNSS (no performance degradation at all) and full benefits of broadband wireless.

Those who cannot innovate in Silicon Valley, lobby in Washington DC by misinforming the FCC and the Congress about the status of technology and about the status of existing receivers in the field.

TRIUMPH-1

Fully integrated package

all GNSS,
modem electronics
and antennas.

Boxed Version

for reference stations

All-in-one

TRIUMPH-VS

GNSS receiver that combines high performance **216-channel GNSS receiver**, all-frequency **GNSS antenna**, and a modern featured **handheld**.

Spectrum

The unique **spectrum analysis**

and **interference detection/protection** features in our **GNSS receivers**.

Visual Stakeout

Target point itself

View your target point on the **TRIUMPH-VS** screen and **walk towards it** to stake it.

Each of our 6 Parallel RTK Engines

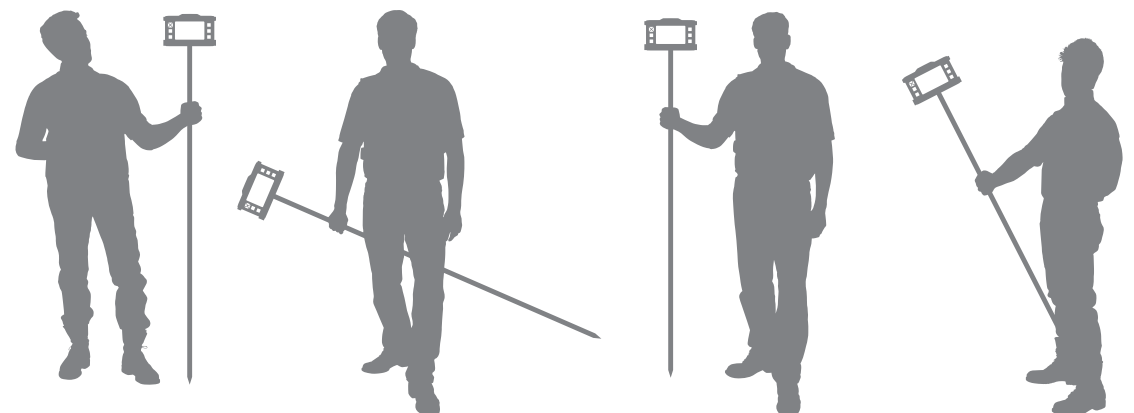

employs different algorithms **to calculate solutions** and the weighted average of them provides the **most robust, accurate and fastest results.**

Survey with Lift&Tilt

You don't need to look.

You don't need to touch.

High performance

Antennas

TriAnt

GrAnt

AirAnt

RingAnt

Software

Complete software suite for survey, GIS and control.

Justin has full range of features for geodetic and surveying tasks.

Giodis is a sophisticated and easy to use geodetic software.

NetView is an application to easily control JAVAD GNSS receivers.

NetHub is a Windows® application for controlling GNSS receivers developed by JAVAD GNSS, INC.
