

## Ashtech can answer your questions about GPS in Precision Farming

**Ask Ashtech - specialists in global positioning and precision GPS for site-specific farm management. Call us with your questions about this emerging technology**

For years Ashtech has been the recognized leader in precision solutions for global positioning and its commercial uses.

Combining our precision GPS know-how with farming was a natural progression for our company. Our agricultural division is headed by special people who are experts in both GPS and farming. Unlike others, we bring expertise in both these areas to our product development. The result has been what we believe is the most useful and reliable system for site-specific farm management - the Ag-Navigator™.

The Ag-Navigator is a rugged, portable and fully-integrated system for field navigation, guidance, mapping and data collection.

It gives you real-time navigation, sub-meter accuracy for reducing overlap in chemical application and a suite of software that enables understanding and using field data.

We want you to understand precision farming and how a good product can be integrated into your farm operation.

The best way we know to do that is to:

- provide the technological understanding necessary to make good choices in farm management
- build a system that is reliable and user friendly.

We invite you to call us to ask about applying GPS technology to agriculture.

## Ashtech Reliance™

### Ashtech - A Welcome Addition to GIS

Whatever you want to map, whether it's a wetland or a power pole, water meter or crop infestation, Ashtech's Reliance field asset management tools are your best choice for fast, accurate results.

Ashtech has taken its precision solution techniques and integrated them into a line of field asset management tools tailored for GIS professionals.

### Precision Solutions for GIS = Ashtech Reliance

Ashtech's Reliance GPS systems provide reliable, on-the-fly decimeter accuracy. Using the Windows® operating system, these easy-to-use field asset management tools save time and money while enhancing the quality of your asset database.

### ISO 9001 Quality

Thousands of GPS experts have made Ashtech the leader for global positioning. Ashtech has become a worldwide reference standard. ISO 9001 certified, we have a proven reputation for precision solutions and quality products.
