

Get Accurate. Get Ashtech.

Now you have a better GPS choice for GIS data capture.

Get Accurate. Get Ashtech.

Now you have a better GPS choice for GIS data capture.

Decimeter accuracy and Windows® software give you the winning partner for GPS...the Ashtech Reliance™.

Ashtech built its reputation on accurate, robust GPS systems for surveying. Now we bring the same advantages to field asset management.

Our Reliance system is specifically designed for GIS feature and attribute data collection. With easy-to-use menu-driven commands, accurate data collection is at your finger tips. No matter where your projects take you, Reliance systems work better, including under trees or around buildings!

With the Reliance system, you define what you're mapping for easy feature and attribute data collection. And back in the office, our Windows Reliance Processor™ software is just as easy to use, for powerful differential GPS processing and exporting data to your GIS.

How accurate? That's up to you, because we offer a choice of submeter or decimeter precision. Or, if you need survey accuracy for control and topographic work, upgrade to the centimeter processor option. We're also ISO-9001 certified, so you can be confident you're getting the best GPS quality and service available.

For a free Reliance video and data sheet, call us today at 1-800-922-2401.

Ashtech

The Best of Both Worlds.

Ashtech brings GPS & GLONASS together, precisely!

The Best of Both Worlds. Ashtech brings GPS & GLONASS together, precisely!

Introducing the Ashtech GG24 receiver. The world's first integrated GPS+GLONASS solution on one board.

If you thought GPS accuracy was impressive, wait until you add *another* 24 satellites. Meet Ashtech's revolutionary GG24™, the first global positioning receiver to combine all-in-view GPS and GLONASS. The winning result is 10-meter autonomous or 40-centimeter differential positioning accuracy!

The GG24 treats GPS and GLONASS as one 48-satellite constellation—making its sophisticated integration transparent to users. Best of all, 48 satellites increase availability so that at least 11 satellites are always visible anywhere on earth, ensuring continuous positioning.

This gives you an incredible advantage in demanding applications where GPS-only visibility can be obstructed by tall buildings, mountains or dense tree cover.

The GG24 delivers *more availability, improved integrity and greater accuracy* for global positioning. Put the best of both worlds to work for you and call 1-800-922-2401 for more information.
