

Technology years ahead of the competition

Now Field Tested and Proven

**RTK in places
never dreamed
before**

Direct connection
with our GPS-coupled
spread spectrum radio
40 channels of L1,
or 20 channels of L1+L2,
GPS or GPS+GLONASS

Up to 60 dB
of "IN-BAND"
interference
suppression

Parallel port

Four 115Kbps
serial port

3.3 watt power
consumption
(unregulated input
4.75...28V)

Up to 76 MB
of data
storage
(removable
CF card)

Your GPS RTK sometimes does and sometimes doesn't work. This is because it sometimes does and sometimes doesn't have enough satellites. Javad has more satellites. Instant RTK all the time with dual frequency of 42 (later 51) satellites.

JPSEuro, our Eurocard compatible board, is based on the same technology and features as in Odyssey, Legacy, and Regency electronics. It provides the highest quality code and carrier data on both C/A and P codes of L1 and L2. The Cinderella feature makes JPSEuro password upgradeable from GPS L1 to GPS+GLONASS L1+L2.
