

our

great

history

JAVAD

We have a great history, but we never look back. Our aim is firmly set on the future. By now, you have surely experienced some of our historical GPS and GLONASS technologies. We pioneered high precision GPS at Trimble and founded Ashtech and JPS (later TPS / JNS). Now, we are again moving forward to create a new amazing GNSS technology with the soon-to-be-launched JAVAD GNSS. www.javad.com
